EXISTING RISKS OF PLAYBETS TOKENS, RISK FACTORS

Risks linked to the Ethereum network

Tokens of the PlayBets gaming platform are available on the Ethereum platform. In connection with this, any defect or incorrect functioning of the Ethereum protocol could lead to unforeseen changes in the operation of the PlayBets platform. In addition, achievements in the sphere of cryptography or other technical achievements could represent risks for PLT tokens and the Ecosystem, including the advantages of using PLT tokens in the Ecosystem, if the mechanism of cryptographic uniformity at the base of the Ethereum protocol is rendered ineffective.

Risks linked to hacking and flaws in the security system

Hackers or other criminal groups or organizations may attempt to influence the Ecosystem or PLT tokens in various ways, using, among other things, attacks by malicious software, DoS attacks, agreement attacks, Sybil attacks and viral connection imitation.

Standard uncertainty

In connection with the fact that this project uses blockchain technologies, PLT tokens may be affected by one or more requests, injunctions or other actions from regulating bodies across the world, including, but not limited to, the placing of limitations on the use or possession of digital tokens like PlayBets tokens, which may influence the functionality of PlayBets tokens in the future.

PlayBets (PLT) tokens are not an investment

PlayBets (PLT) tokens are not official and have no obligatory judicial force as an investment. For reasons, independent of the initiators of the project, the aims described in this document may change. In spite of the fact, that the project team intends to realize everything described in this document, all individuals and parties that purchase PlayBets tokens are acting at their own discretion and risk. Terms of development, for objective reasons, may be increased or reduced due to range of factors.

Voluntary character and absence of full regulation

In spite of the fact, that PlayBets (PLT) tokens are not an investment, their value may increase or fall, if the PlayBets platform experiences a scarcity or overload of tokens. The PlayBets game platform bears no responsibility for the cost of PLT on cryptocurrency exchanges or any value lost or obtained.

Risk of loss of funds

The funds from the ICO are not insured. In the case of loss of value, there is no insurance representative that the purchaser can address.

Risk of partial investment return

If the PlayBets game platform does not reach its minimum Soft Cap fundraising threshold, all funds will be returned to the token purchasers, after expenses are deducted for the marketing campaigns at the Pre-ICO and ICO stages.

Risk of fundraising failure

There is a possibility that for various reasons, the PlayBets platform and all subsequent actions related to gathering funds in the Pre-ICO and ICO stages may not achieve success for various reasons (low-quality development of marketing strategies, poor delivery of product to end user, competition etc.).

Risk of using new technologies

PlayBets tokens, like any other crypto-tokens, are a new and relatively untested technology. There are also additional risks linked to the use of information technologies that the game platform's team cannot foresee. These risks may influence other aspects of the project's activity and sharpen the risks previously indicated here.

Risks linked to development and technical servicing of the PlayBets ecosystem

The PlayBets game platform is still in the stage of development and over time it may undergo significant changes. Development of the platform depends in no small part on the number of PLT tokens sold during the crowdsale stage. Apart from that, in spite of the well-intentioned efforts of the company to develop and run the game platform, there is a possibility that PlayBets will experience technical difficulties or may, for some other reason, not be developed or serviced as expected, which may negatively influence the platform and PLT tokens, along with the potential value of the PLT tokens, including the advantages of using PLT tokens on the PlayBets game platform.

Risk of liquidation of the company or ecosystem

It is possible that, for a range of reasons, including, apart from anything else, unfavorable fluctuations in the value of ETH, BTC or other cryptographic currencies, the value of PLT tokens may go down, commercial relationships may fail to develop or problems may arise with intellectual property, or the functioning of the PlayBets platform may become unfeasible or the company may be liquidated.

Integration

This Agreement represents a full agreement between parties in relation to the item of this Contract. All previous agreements, discussions, presentations, guarantees and conditions are unified in this document. Between the parties there are no guarantees, concepts, conditions or agreements, clear or implied, with the exception of those that are clearly indicated in this Agreement. This Agreement can be changed only through a written document formed by the parties in the proper manner.

DISCLAIMER OF WARRANTIES AND GUARANTEES. YOU AGREE THAT YOUR USE OR INABILITY TO USE PLAYBETS TOKENS IS PERFORMED EXCLUSIVELY AT YOUR OWN RISK, AND YOU TAKE ALL THE RESPONSIBILITY FROM THE PLAYBETS PLATFORM.

FROM THE MOMENT OF RELEASE, PLAYBETS TOKENS WILL BE ISSUED WITHOUT GUARANTEES, INCLUDING A DISCLAIMER OF ANY GUARANTEES FOR ALL IMPLIED GUARANTEES OF COMMERCIAL VALUE FOR A SPECIFIC GOAL, THE NAME, WITHOUT VIOLATING THE INTELLECTUAL PROPERTY RIGHTS OF ANY PARTY. SINCE CERTAIN JURISDICTIONS DO NOT ALLOW IMPLIED GUARANTEES TO BE DISCLAIMED, THE AFOREMENTIONED EXCEPTIONS OF IMPLIED GUARANTEES MAY NOT APPLY TO YOU.
